COMPANY OVERVIEW

Technology has become an integral part of every business nowadays. Seeing the importance of technology in the modern world, HawodTech Solutions Incorporated has been established.

HawodTech Solutions Inc. is a dynamic company specializing in Information Technology. With several years of experience of I.T. staffing in the U.S. market, it is our goal to expand our services and connect with companies across the globe. We aim to provide technological support to drive local and international companies towards their business goals.

WHY PARTNER WITH US?

Expertise in Multiple Industries and Specialize in Information Technology
A team comprised of members with diverse backgrounds. We have U.S.-trained recruiters with 7 years of experience in the I.T. industry.

Speed and Quality
Deliver fast results without compromising quality. We maximize premium tools and job platforms to source for the best talents locally or internationally.

Cost Efficiency
We only charge for successful placements. No upfront payment.

Free Replacement
One-time free replacement within the initial three-month period.

Relationship Management
We are your partner all throughout the process, up until the onboarding to ensure that the new hires are fully engaged with your team.

Language Centers Partnerships
We can provide high-caliber, bilingual talents to optimize your business.

RECRUITMENT AND STAFF AUGMENTATION

Recruitment and staff augmentation are big aspects of our capabilities. We provide you convenience and time to focus on other important aspects of your business while we take care of your manpower requirements. We are backed by professional recruiters and information technology professionals who understand your business operations, thus taking charge of every step of the recruitment process, from screening, selecting, and onboarding.

OUR PARTNERS

PAST EXPERIENCES

- Developed a turnkey 300+ people call center in a span of two months, for a large agency in the State of California, comprised of remote workers supporting surge calls due to crisis response.
- Delivered a 700+ people call center support team to assist in New York and Texas state vaccination appointment line program.
- Sourced a unicorn hire, a Tenable Security Engineer, for a short-term project. The position was essential to handle overall product 'health check' of Tenable Security Center (SC) technical environment and assessment of its usage by client.
- Provided staff augmentation for helpdesk, configuration support, IT consulting, project management, custom software development, and data engineering for one of the largest multinational professional services network in the U.S.
